Project Diagnosis Clinic

The research journey is long and can be lonely, added to it is the technological difficulties. Help can be very difficult to find. Here at Elizabeth Training, we can help you by screen sharing and diagnose your problem.

Can you relate to at least one of these frequent problems with your NVivo project?

- It is difficult for me to explain via phone or email what is wrong with my project! I can't analyse it.
- I need someone to look at my coding system and suggest improvement to move me on to generate some reports.
- I have generated a matrix coding but there is no intersecting references. I need someone to look at my project and tell me what is wrong and how to resolve it.
- How do I classify my transcripts so I can do comparative analysis of my coding?
